Dear Dr. ETCHEPARE,

Please be advised that it is possible to file a divisional application with the two claims you proposed without risking double patenting objections, since they are the upper concept of the pending claims and there are no kit claims in the pending set of claims (please note that the phrase "kit of part" is not used in Japan and would lead to an clarity objection; usually a phrase such as "a kit comprising..." or "a kit for use in..., comprising..." is used in Japan).

If you have any questions, please do not hesitate to contact us.

Very truly yours,
Satoshi Kobayashi

2022年9月9日(金) 18:35 Laetitia Etchepare <let@icosa.fr>:

Dear Colleagues,

We revert to you regarding the patent application in reference.

We would like to have your opinion on the following point.

Pending claim 19 (see pending set of claims enclosed) is directed to a composition comprising an antibody molecule or an antibody fragment binding to hGPVI and defined by the 6 CDR sequences for use in the treatment of a GPVI-related condition, *wherein said antibody molecule or antibody fragment is to be administered during at least two hours to the subject, and wherein said subject is to be treated with a thrombolytic agent before, concomitantly or after the administration of the protein.*

In view of this claim, could you please let us know if it is possible to file a divisional application with the two claims as recited hereinbelow without risking double patenting objections ? If not, can we remove the claims 19-20, related to a subject treated with a thrombolytic agent, from the pending set of claims in order to file a divisional application with the two claims as recited hereinbelow ?

"A composition comprising an isolated humanized protein binding to human Glycoprotein VI (hGPVI) for use in the treatment of a GPVI-related condition in a subject in need thereof, wherein said subject is to be treated with a thrombolytic agent before, concomitantly or after the administration of the protein."

“A kit of part comprising, in a first part, at least one isolated humanized protein binding to human Glycoprotein VI (hGPVI) and, in a second part, at least one tissue-type plasminogen activation (t-PA)”.

We thank you in advance for your help in this matter.

Best regards,

Laëtitia

Dear Colleagues,

We revert to you regarding the pending Office Action for the patent application in reference: please find herewith enclosed our instructions for response, and an amended set of claims. Please feel free to amend the attached files in order to comply with Japan Patent Office standards. However, any amendment modifying the scope of the claims should be submitted to us for approval before filing.

Please prepare and file a response in due time.

Please note that our client would like to file a divisional application, to protect another object that is not claimed in the present set of claims.

Could you please confirm that we can file a voluntary divisional application after filing the response to this Office Action ? Or do we need to file a divisional application with the response to the Office Action ?

We thank you in advance for your help in this matter.

Please do not hesitate to contact us for any further question you may have.

Dear Sirs,

Please see the attached our inquiry about Request for Examination for the above-identified application.

A new Fee Reduction System for examination request fee and annuities has been available from April 1st, 2019. If the status of the applicant(s) meets certain requirements, the examination request fee and annuities (1 to 10 years) can be reduced.

If you are interested in using this new Fee Reduction System, please complete the New Fee Reduction Candidate Check List for each applicant.

If this has not been filled out, we will not apply for the fee reduction system.

We confirmed in other case that INSERM is not entitled to the fee reduction.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

Shiori Sasaki (Ms.)
